What are the odds?

Table-Top Game Players everywhere roll lots of dice-sometimes hundreds of times a game. But do they really know the odds of rolling certain numbers?

Most people, generally, believe that rolling a seven is difficult. The chances of rolling a seven are actually 1 in 6. Snake eyes and 12s are the most difficult on a dice throw.

2 and 12 - 1 in 36, **3 and 11** - 2 in 36, **4 and 10**- 3 in 36, **5 and 9** - 4 in 36, **6 and 8**- 5 in 36... **a seven** - 6 in 36.

Fan Game Story / Cubs vs. Cards / April 5, 2014

"What a Game!" that's all I can say. My Cardinals trailed 5-1 after 5- tied the game in 6th- at 5 then fell behind 6-5 going to the bottom of the ninth. But with two out in the ninth- one out and one on- my opponent (Gregory) pitched down the middle... and well- IT WAS GONE for a Walk-off Homer and a dramatic 7-6 St.Louis win! *From Nathan Delores / Lutesville,MO. If you have a table-top Game Story-please send it to us. Thanks- Lynx Sports.*
